

WESTERN SCIENTISTS RESPECTED NON-WESTERN SCIENCE

Do not be judgemental about people's perspective in how to better the surroundings.

DOMINANT GROUPS SAW THEIR LOSS AND HURTS FROM DOMINATION

Can ecological science be my ethics?

WESTERN VALUES SHIFTED AWAY FROM THE ASCENDANCY OF THE INDIVIDUAL

Always thank my parents and my background

POLICY MAKERS BASED DECISIONS ON THE INTERESTS OF ALL - NOT JUST THE POWERFUL

Internal (self) evaluation

SCIENTISTS RISKED ENGAGING WITH COMMUNITIES

Increase the number of action + people in community way of thinking

~~Reconnection~~ Reconnection with simplicity

PROBE, REFLECT, CREATE CONNECTIONS } ETHICS

POLICY MAKERS EMPLOYED LONG-RANGE VISION

THE EPA EMPOWERED VULNERABLE COMMUNITIES

NO ETHICAL DIFFERENCE WITHOUT DIFFERENCE IN ACTION

SILENCE NOT FILLED UP SO SILENT CAME TO SPEAK

RELIGIOUS FUNDAMENTALISM WAS MODERATED

Open our willingness to learn about others point of view (eg. child, old, black, white, indian, asian, western)

Willingness to consider own wisdom/knowledge & integrate it with others

Enjoy and not fear new fields of study

ACADEMICS RISKED IMPLEMENTING COLLECTIVE + MULTI DISCIPLINARY PARTNERSHIPS

Integrate multi disciplines in your daily life

Don't force participation

TO NOT BE AFRAID OF NEW THOUGHTS

PRIMARY ACTORS UTILIZED EMPATHY IN ENGAGING "THE OTHER"

Reconnect with the feeling of "sense of place"

(theoretical) Do science, also do it in a way that can collaborate in the solution

Listen, create and remember where the need of knowledge come from
